INTRODUCTION:

This manual contains information on the glassfront vendor and the various models within the product line along with optional equipment and accessories offered for each model.

The glassfront vendor has a "First-In", "First-Out" vending procedure and features the "Vend the Item You See", therefore does not require a display item and eliminates the need of product rotation to insure product freshness. Each product tray can be pulled forward and/or tipped for easy loading, cleaning, and servicing. There are three types of trays: a Flatwire Helix Tray, which is used for vending large items such as pastry, chips, etc.; a Round Wire Helix Tray for small items such as candy; and a Gum and Mint Tray. Each selection has an individual motor for rotating the selected product to the delivery hopper and advancing the next product to the vend area. All Glassfront Vendors are available with the following types of coinage systems:

- A standard Four Price Coinage System
- A Multi-Price Control Coinage System

The coinage systems are explained and outlined on pages 6 through 10.

VARIATIONS:

The Tray configurations are explained in pages 13 through 17.

The number of selections are as follows:

- 15 Selection
- 18 Selection-15 Selection Plus
- 3 Selection Gum and Mint Tray
- 25 Selection
- 30 Selection
- 30 Selection-25 Selection Plus
- 5 Selection Gum and Mint Tray

SPECIFICATIONS:

| CABINET: | Model 15 & 18 Selection | Model 25 & 30 Selection |
|----------|----------------------------|----------------------------|
| Height: | 68" | 68" |
| Width: | 28" | 38" |
| Depth: | 31" | 31" |
| Weight: | 425 Pounds | 570 Pounds |

ELECTRICAL: Line Source 115 VAC, 60 H
Current 14 AMPs maximum

COINAGE:

FOUR PRICE CHANGER

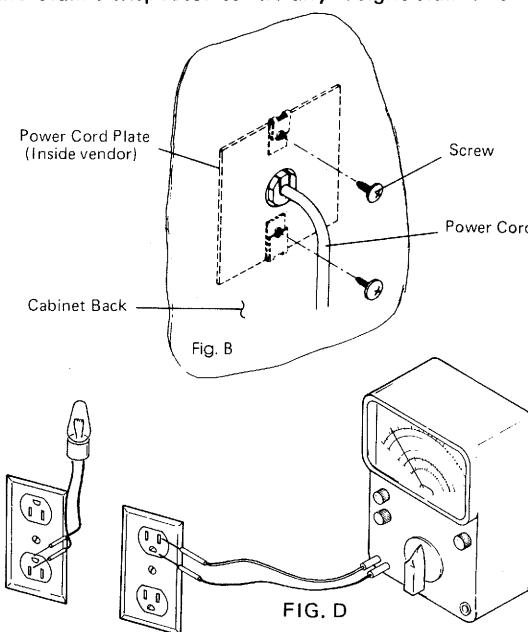

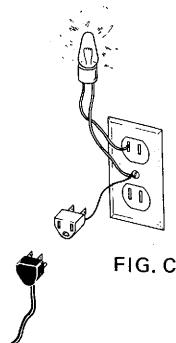

Accepts nickles, dimes, and quarters. Selection of four vend prices, 5¢ through \$3.15; Adjustable in 5¢ increments. Change pay-back is in 5¢ increments as long as adequate change is available in change tubes; with tube escrow until selection.

MULTI-PRICE COINAGE SYSTEM

Accepts nickles, dimes, and quarters. Selection of thirty vend prices, 5¢ through \$3.15; Adjustable in 5¢ increments. Change pay-back is in 5¢ increments as long as adequate change is available in change tubes; with tube escrow until selection.

INSTALLATION INSTRUCTIONS:

1. Remove all packing material in a manner not to damage the finish or exterior of that Vendor. To unlock the door, the key will be found taped inside the Coin Return Cup. Remove all shipping brackets, inner packing material, and tape from the Vendor. To try to operate the Vendor without removing the tape from the moving parts may result in damage.
2. Record the Model Number and Serial Number of the Vendor and refer to these numbers on all inquiries and Correspondence pertaining to that Vendor.
3. This Vendor was thoroughly inspected before leaving the Factory, and the Carrier has accepted this Vendor as their responsibility. Any damages or irregularities should be noted at the time of delivery and immediately reported to the Delivering Carrier. Request a written Inspection Report from the Claims Inspector to file any freight claims for damage. File claim with CARRIER...NOT with MANUFACTURER.
4. Run the Power Cord through the hole in the cabinet back. Align the two holes on the Cord Plate with the holes on the back of the Cabinet. Then attach the Plate with the screws provided. (See Fig. B.)
5. To insure safe operation of an electrically equipped vendor, the vendor must be grounded. To verify that the receptacle is properly grounded, connect one probe of the test light to the screw holding the receptacle cover. Insert the other probe into the opening of each outlet. If the test light does not light when placed in either side of the receptacle, the receptacle is not grounded. To provide a proper ground use an adapter which has a ground wire attached. The wire should be connected to a ground such as a water pipe. If the receptacle is grounded but is not the three-prong type, the adapter may be used. Attach the wire to a ground or to the receptacle cover securing screw. (See Fig.C.)

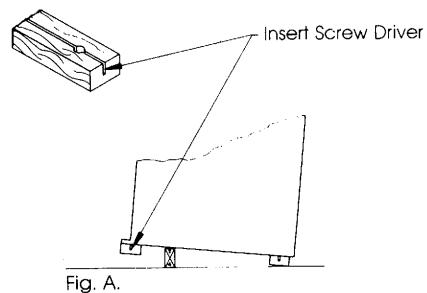

Receptacle with three (3) female openings. To verify that the receptacle is properly grounded and polarized, insert one probe of a voltmeter (set to check AC line voltage) or test light, in the ground terminal position "hole" of the 3-position receptacle, insert the other probe (of voltmeter or test light) in the L.H. slot (if ground "hole" is up) or in the R.H. slot (if ground "hole" is down). You should read 115 VAC on the voltmeter, or the light should light.

If you find this is not the result, you should contact a licensed electrician to correctly polarize and/or ground the receptacle to insure safe operation.

Consult Local, State, and Federal codes for compliance before installation of vendor. (See Fig. D.)

6. Remove Knock-A-Way Support by inserting a screwdriver and splitting the Knock-A-Way in two. Turn the leveling screws in as far as possible. Position the Vendor in its place of operation. Level the Vendor, making sure all levelers are touching the floor. The Vendor must be level for proper operation and acceptance of coins through the Coin Mechanism. If the Vendor is properly leveled, it should not rock or teeter on any of the levelers. (See Fig. A.)

HELIX TIMING:

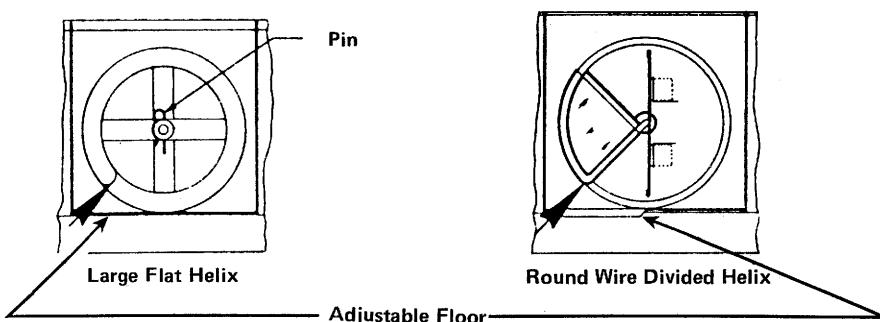

After installing a new motor the Helix must be timed. Make sure the motor is in its home or detent position.

Large Flat Helix:

To remove, pull out pin at back of Helix. Replace Helix on motor shaft, with end of Helix positioned as shown by the arrow. Align hole in Helix hub with motor shaft and replace pin.

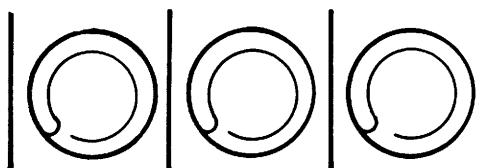

Round Wire Divided Helix:

No timing is needed.

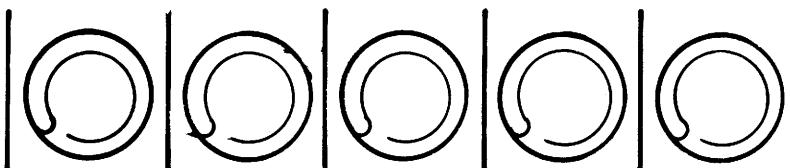

PRODUCT LOADING:

**Model
15 and 18 Selection**

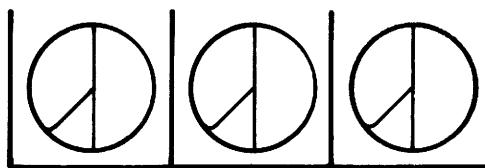

Flat Wire Helix Tray

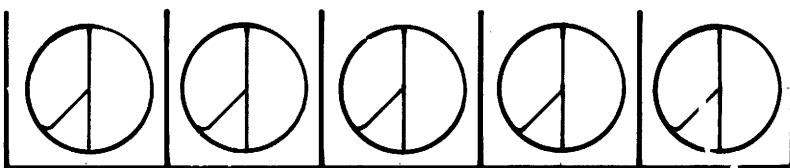

**Model
25 and 30 Selection**

Flat Wire Helix Tray

Round Wire Helix Tray

Round Wire Helix Tray

Lift front of drawer upward and pull forward to stops.

Load all products upright, front to back, with the identification forward.

The Flat Wire Helix loads with the products resting on the bottom coil of the Helix.

The Wire Helix loads with the products resting on the floor between the Helix.

After loading, check to see that the adjustable floor (See Helix Timing) is properly adjusted. Adjust by moving floor in or out to secure the front product will not slip out of the Helix.

Finally, test vend each selection to insure the first slot in each selection is filled.

Make sure the products fit easily into the Helix spacings.

GUM AND MINT TRAY

Unlatch Tray by pushing up on the rod in the middle of the Tray. Pull Tray forward until it stops and lift up on the lid. The Product Pusher will stay back in the Vendor. The product is placed with the long edge in line with the front of the Tray. The product identification should be either on the front and/or top of the product when looking from the front of the Vendor.

PRICE-SETTING INSTRUCTIONS:

COINAGE TYPE: Coinco 5¢ – \$3.15 Four-Price Changer.

1. With power on, remove the Acceptor (see Fig. A); and place in an area free of dirt.
2. The Price Switch Module has six miniature rocker switches, numbered (1) through (6) make sure they are all in the off position. These switches correspond to prices as follows:
1=5¢, 2=10¢, 3=20¢, 4=40¢, 5=80¢, & 6=\$1.60.
Set the Vend Price by adding the value of the rocker switches that are in the on position. For example, switches #1 and #3 are on, that equals 25¢.
3. After setting the desired Vend Price on the Price Switch Module momentarily depress the Price Arming Switch, then within 10 seconds press one of the selection buttons on the front of the machine, or turn the Helix itself.

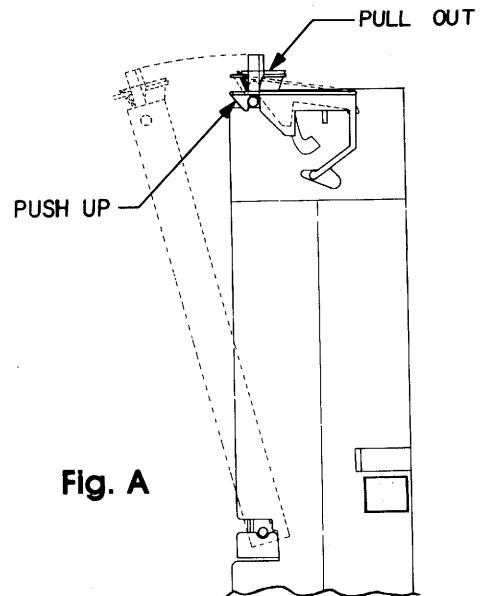

Fig. A

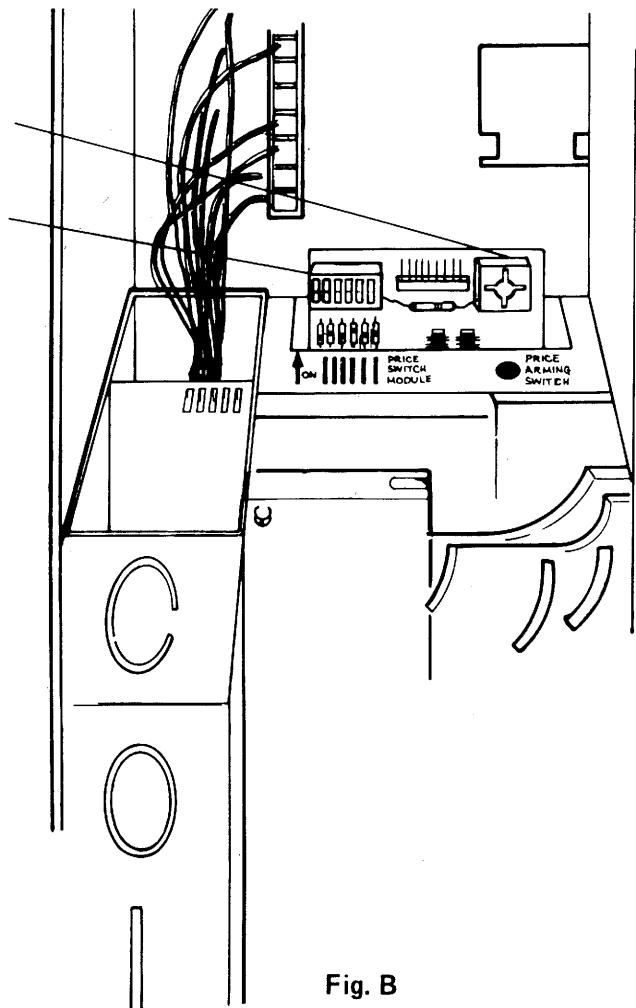

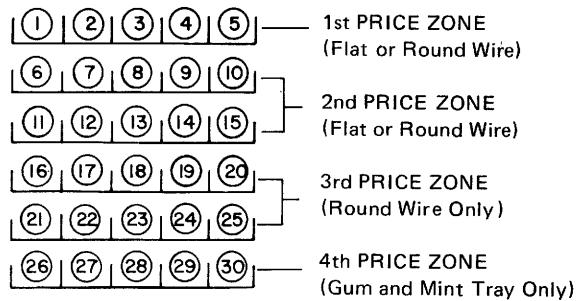

Fig. B

The price is now set for all selections on that Price Zone to the preset price on the Price Switch Module. Repeat this step for all (4) Price Zones during initial installation. For the Price Zone(s) that need changing after initial installation, repeat this step. The Price Zones are shown on page 7 for the various number of selections. All selections on a tray are in the same price zone.

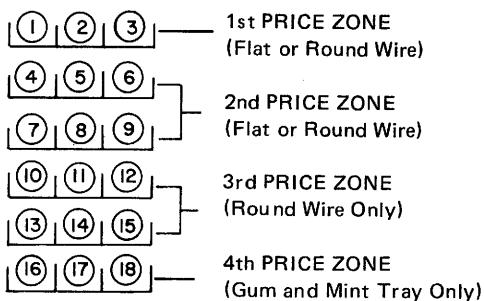

Price Zones For Four Price Coinage System:

The vend price must be selected in the Coin Mechanism, and that procedure is explained on Page 6.

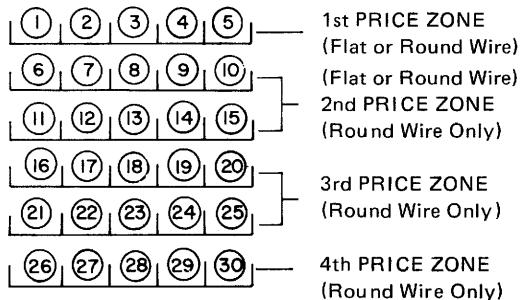

25 SELECTION with 5 SELECTION GUM and MINT

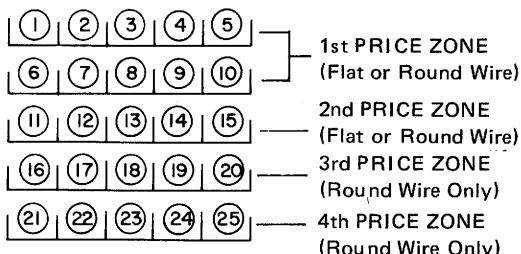

15 SELECTION with 3 SELECTION GUM and MINT

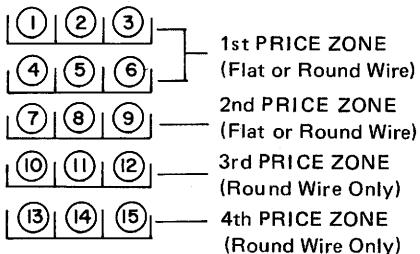

30 SELECTION

25 SELECTION

15 SELECTION

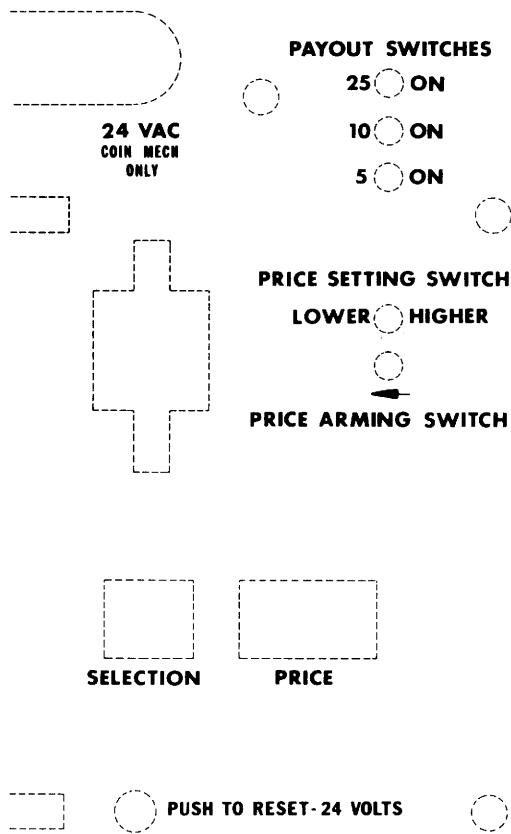

MULTI-PRICE COINAGE SYSTEM \$3.15:

Important

The Multi-Price Coinage System is able to be set for a maximum of thirty different vend prices. The Vend Prices are set at the Control Board instead of at the Coin Mechanism.

1. Actuate Price Arming Switch.
(.05 will appear in the Price Display.)
2. Move Price Setting Switch, higher (right) or lower (left), to the desired vend price. This price will be shown in Price Display.
3. After determining which selections are to be set at this price, turn the corresponding Helix until it runs automatically. An alternate method of Price Setting is to push the desired Selection Button at this time. The Helix will not turn.
4. While the Helix is turning or the Selection Button is depressed, the Display will show the Selection Number and the new vend price.
5. Repeat steps one, two, and three until all selections are properly set.
6. Actuating the Price Arming Switch again will put the Vendor back into the Stand-By Mode.

Note: If the Vendor is left in the Price Changing Mode, the Control Unit will automatically switch back to the Stand-By Mode 30 seconds after the last operation.

Warning

Turning a Helix or depressing a Selection Button before being removed from the Pricing Changing Mode will result in changing that selection to the last vend price set.

7. After Vendor is switched or has "Timed Out" to the Stand-By Mode, check all selections by turning the Helix or depressing the Selector Button. The selection and price will be displayed.

Note: Interruption of Power will not affect vend prices. Prices will be stored indefinitely without power or battery back up.

MULTI-PRICE II COINAGE SYSTEM \$3.15:

On initial installation make sure the following steps have been covered:

1. Product loaded properly.
2. Pricing labels installed on drawers.
3. All selections priced to agree with labels and products.

All selections can be individually priced at a different vend price.

I. To Set or Change Price:

When in the Price Changing Mode, the number 88 will appear in the display in place of the item number. While in the Price Changing Mode, the Selector Buttons have a second function which is shown in Figure 2.

- A. Push Price Arming Switch on the Control Panel to the left, (See Figure 1.) and close door. The number 88 will appear in display on the front of the door.
- B. Determine item(s) to be priced or changed.
- C. To raise vend price, press Selector Button #4 and hold until desired vend price appears in display.
- D. To lower vend price, press Selector Button #5 and hold until desired vend price is reached.
- E. When desired vend price is reached, wait until the number 88 disappears from the display. Then press the Selector Button(s) needing the new vend price.
- F. To continue with price changing the number 88 must reappear.

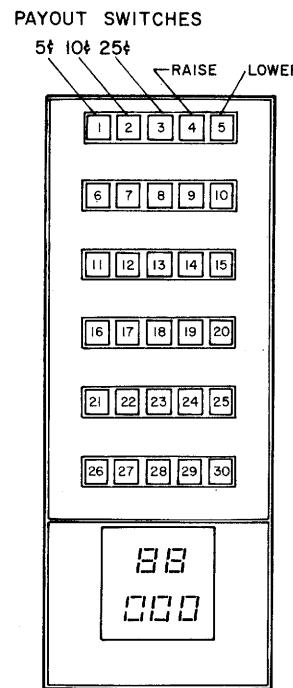

FIG. 2

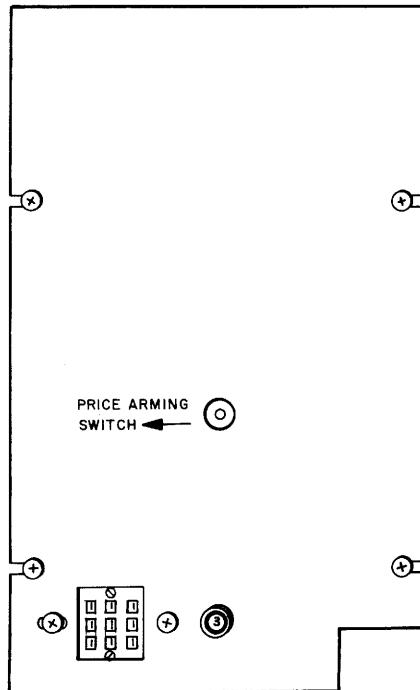

FIG. 1

Note: It is not necessary to establish vend price(s) in numerical sequence of the selections. Price(s) may be established at random.

Warning

To return to the Vend Mode, push the Price Arming Switch to the left. The Vendor will automatically return to the Vend Mode approximately 70 seconds after the last price has been changed or corrected.

RETURN VENDOR TO VEND MODE BEFORE LEAVING THE MACHINE
II. To Check Vend Price of Any Selection:

- A. Press Selector Button and hold. Present vend price will appear in the display window, along with the item number selected.

MICRO-MECH™ INSTALLATION and OPERATION GUIDE:

Note: When Using A Micro-Mech™ , the Price Setting and Inventory Switches are controlled through the Control Board. (See Page 8 or 9.)

1. Depress Spring Clips (2) located on both sides of the Acceptor Assembly (see Fig. 1). Now rotate Acceptor Assembly forward and down. In doing so, the Coin Control Switches on the back of the Acceptor Assembly are revealed.
2. The Acceptor Assembly can be removed. To remove, rotate Acceptor Assembly forward enough to allow the Acceptor Assembly to be lifted to the top of the lower Retaining Slots, and then pull the Acceptor Assembly forward until it clears the Coin Mechanism itself.

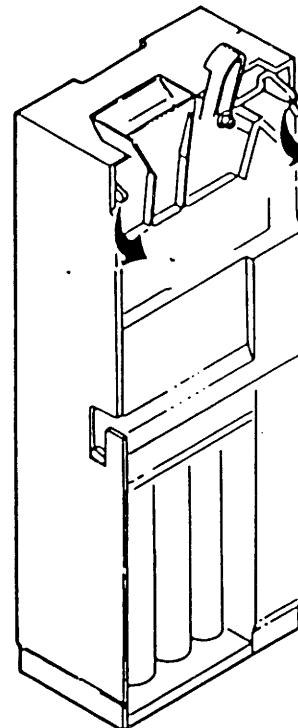

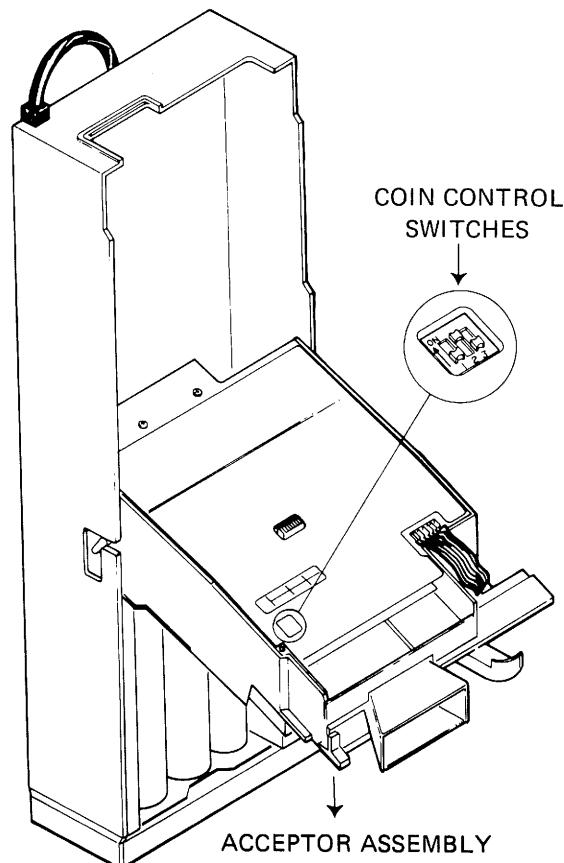

FIG. 1

3. Set the Coin Control Switches on Acceptor using a retracted ball point pen or small screwdriver. DO NOT USE A GRAPHITE PENCIL POINT.

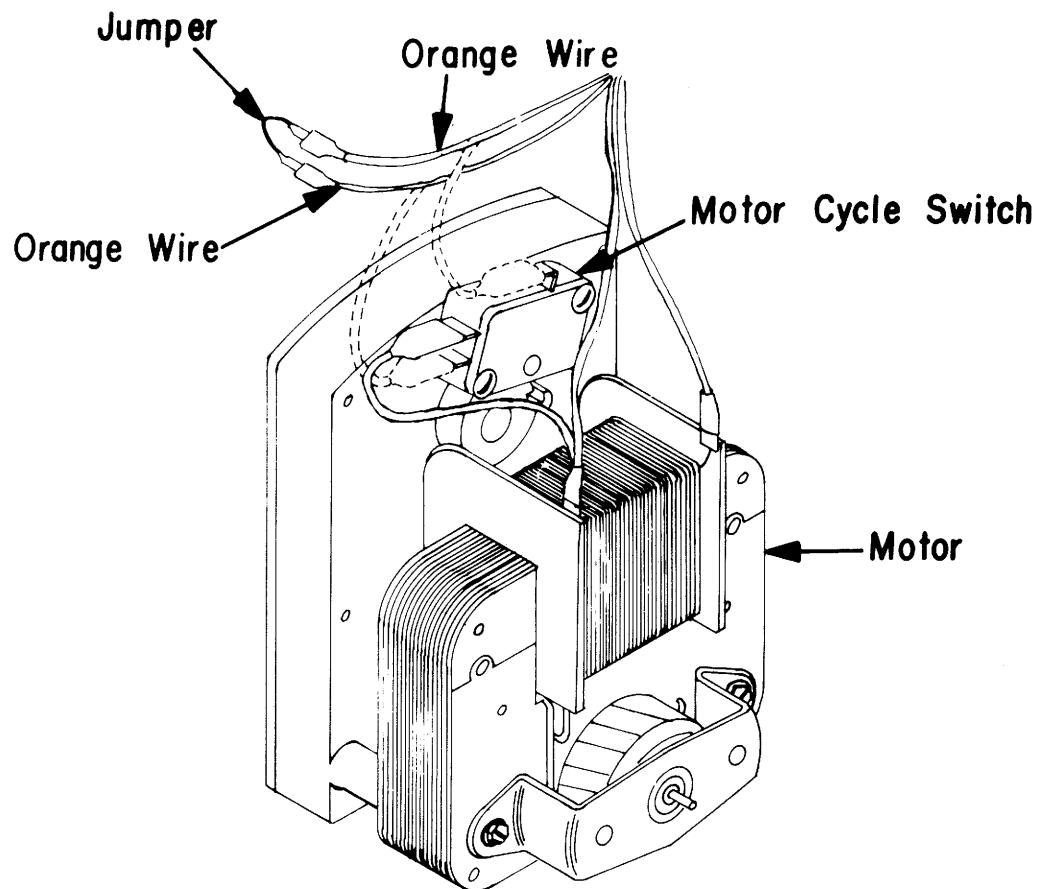

| | | | |
|-------|-----------|--------|------------|
| ON ↑ | CAN/US | HI 25¢ | NO \$ ACPT |
| OFF ↓ | U.S. ONLY | LO 25¢ | \$ ACPT |

CAN/US — Accepts Canadian & U.S. Coins
U.S. ONLY — Accepts U. S. Coins Only

HI 25¢ — Stores 66 Quarters for Change
LO 25¢ — Stores 6 Quarters for Change

NO \$ ACPT — Rejects Dollar Coins
\$ ACPT — Accepts Dollar Coin

4. Install Acceptor Assembly in Coin Changer Housing. Check to insure that the ACCEPTOR IS PROPERLY SEATED WITH BOTH SPRING CLIPS ENGAGED.
5. Fill coin tubes to desired levels by inserting coins into coin tube loading slots located on the front of the coin tubes. Minimum coin levels:
6 Nickles
7 Dimes
6 Quarters (required for dollar acceptance)

MOTOR JUMPER:

Any motor may be disconnected or removed from Vendor. By the use of a motor jumper, the Vendor will continue to work on all selections, except for the selection on which the jumper is used.

To use the Motor Jumper, disconnect the two orange wires from the Motor Cycle Switch and connect one to each side of the Motor Jumper. Remove white/orange wire from Motor Coil and wrap with electrical tape. If removing motor completely, make sure to tape the ends of the remaining wires so they will not short to the cabinet. When reconnecting orange wires to the Switch, be sure to put them in the proper places as shown on Motor decal.

A Tray Jumper Plug may be used when removing an entire Tray. Plug the Jumper Plug into the end of the cable coming from the side panel. This will allow the Vendor to remain in operation.

INSTALLATION of GUM & MINT RACK:

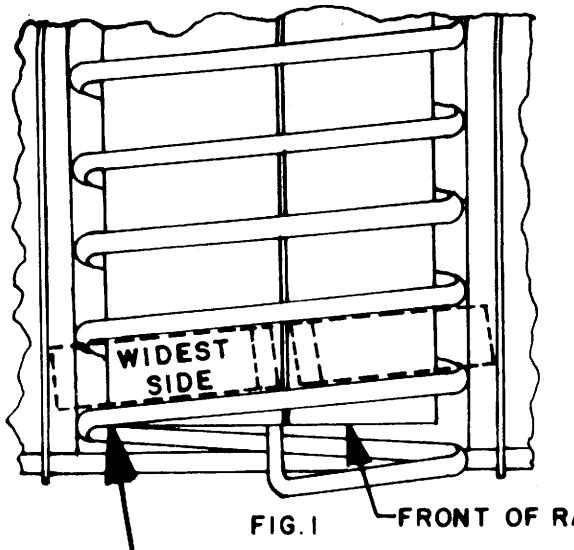

FIG. 1 FRONT OF RACK

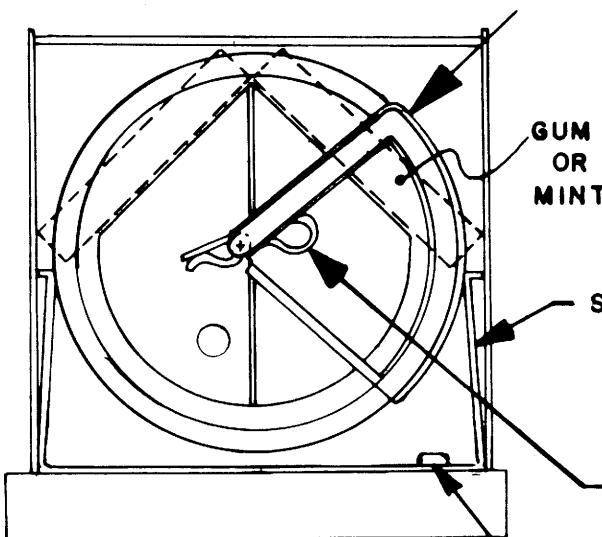

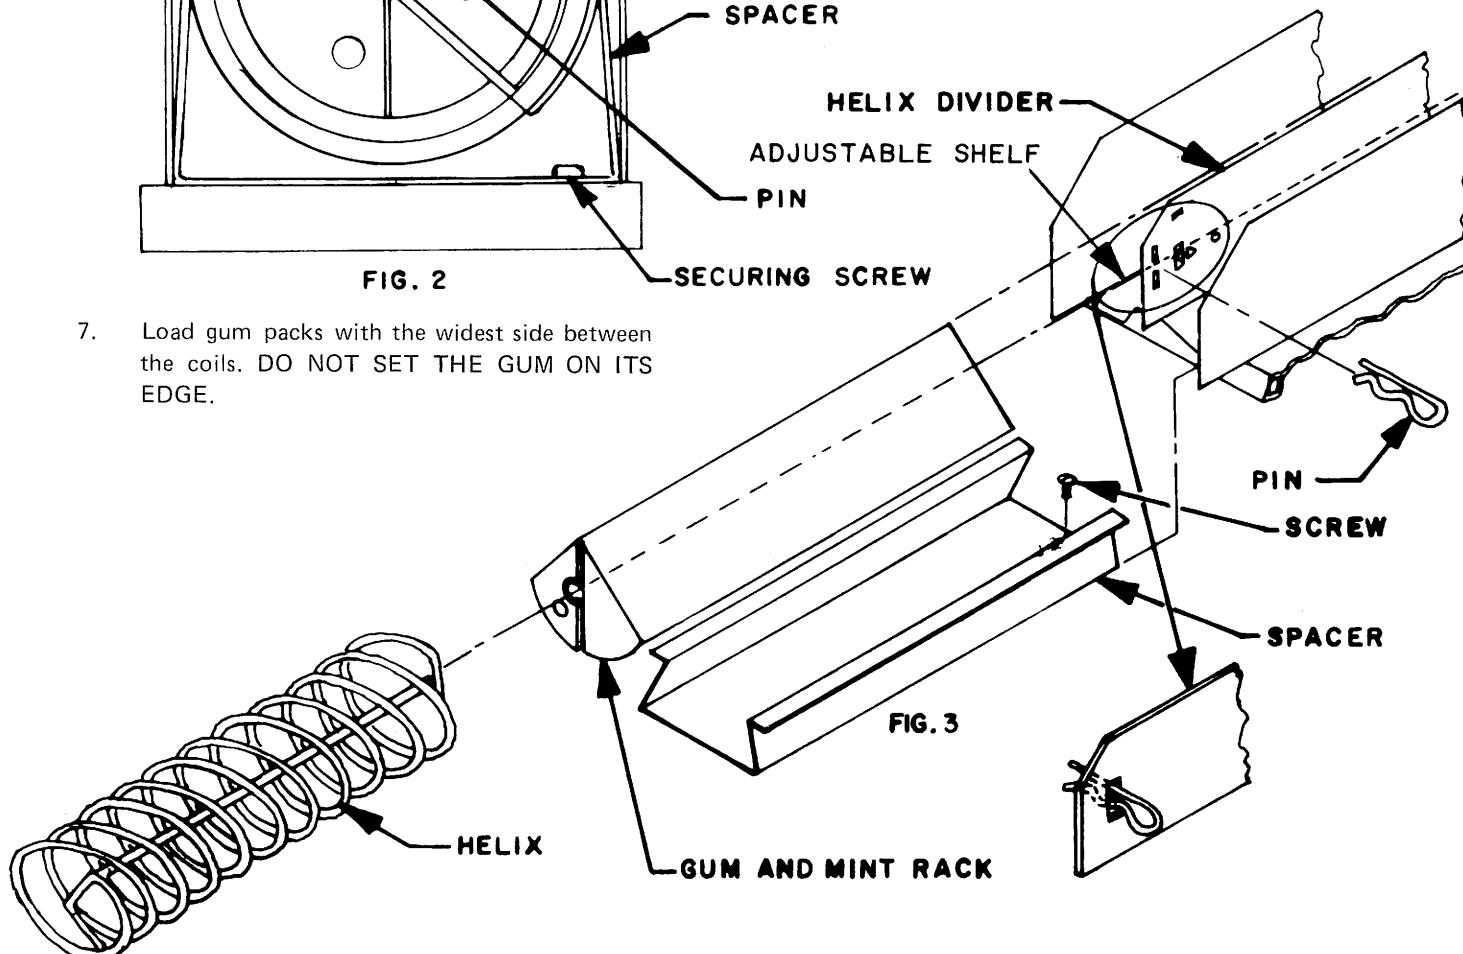

FIG. 2

1. Remove Helix by pulling outward at center of the Shaft.
2. Remove the screw at the back of Adjustable Shelf. Remove Adjustable Shelf (with rubber grommet attached) and discard, retaining the screw. Slide Spacer into position. Align hole at back and reinstall the screw.
3. Slide the Gum and Mint Rack onto the Helix Divider and hold it in place by installing the Pin through the hole in the Divider, as shown in Fig. 3.
4. Install Helix through the hole in the Gum and Mint Rack and into "D" slot in the Motor.
5. Position the front of the Helix, as shown by the arrow in Fig. 2.
6. Stretch or compress the front coil on the Helix and align with the front of the Gum and Mint Rack, as shown by the arrow in Fig. 1.

7. Load gum packs with the widest side between the coils. DO NOT SET THE GUM ON ITS EDGE.

NARROW CANDY BAR SPACER INSTALLATION:

1. Remove the Round Wire Helix by pulling straight outward.
2. Remove one Motor Mounting Screw. Insert one of the Product Spacers and attach by putting screw in slot when replacing screw. (See Fig. 1)
3. Now repeat step #2 for the opposite side. (See Fig. 1)
4. Twist the two front tabs to secure the front of the Product Spacer. (See Fig. 2)
5. Re-insert the Round Wire Helix by pushing straight inward, making sure that the Helix lines up with the "D" hole in the Motor.
6. Load the selection and test vend.

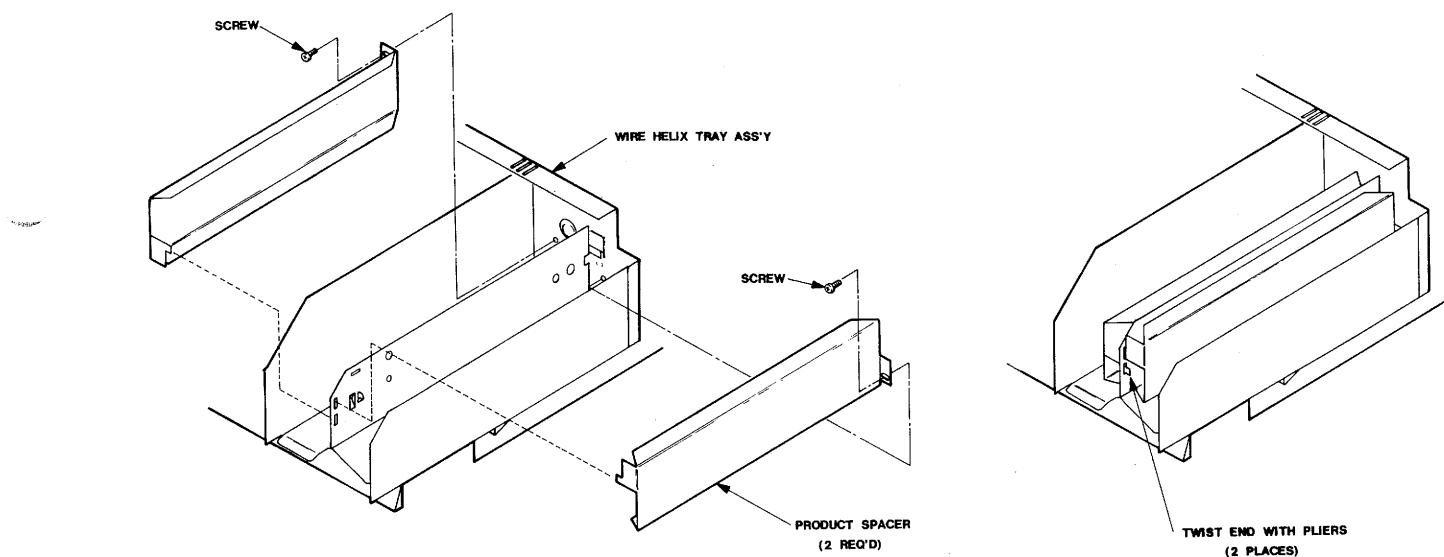

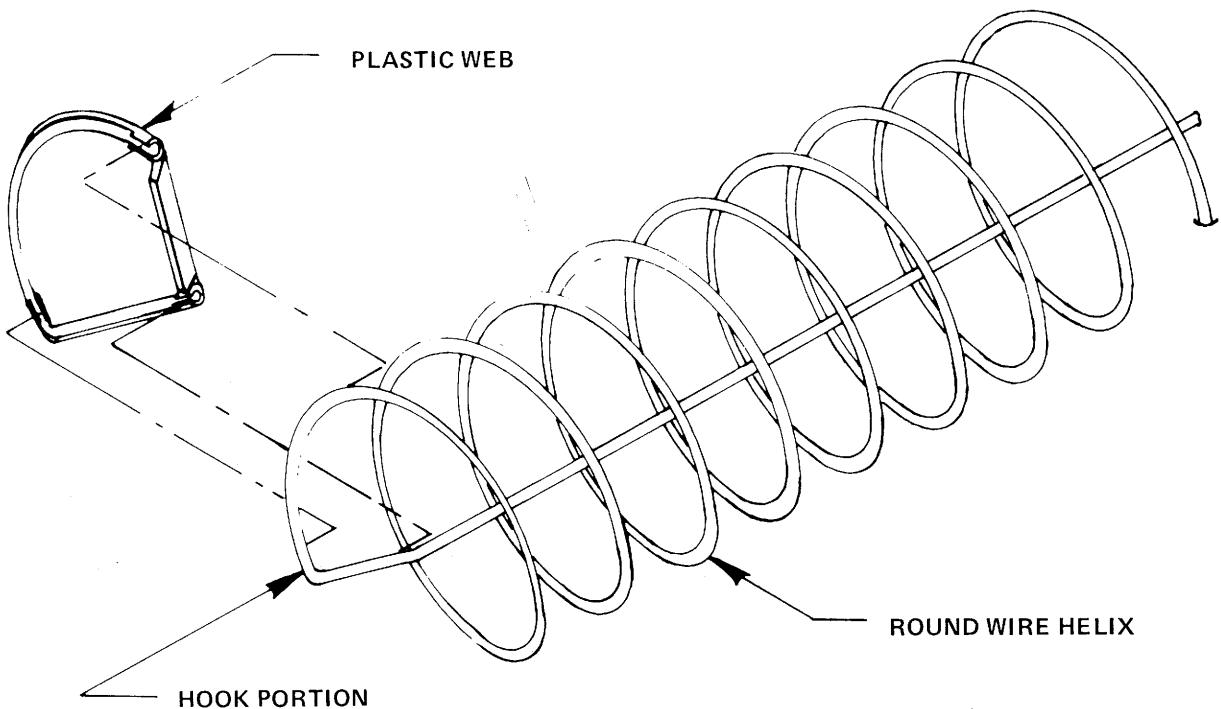

FIG. 1

FIG. 2

INSTRUCTIONS FOR MOUNTING PLASTIC WEB:

Note: The Plastic Web should be used only if you have trouble with the product catching in the hook portion of the Round Wire Helix.

To mount the Plastic Web, just snap it in place as shown in the illustration.

CARE and CLEANING:

DISCONNECT VENDOR FROM POWER SOURCE

- Cabinet Exterior: Wash with warm water and soap.
Occasionally wax with a good auto wax.
- Cabinet Interior: Clear out any foreign particles from delivery box on cabinet. If needed, use a damp sponge and wipe dry.
- Windows: Use any type of plastic window cleaner.
-

ACCEPTOR:

1. Remove Slug Rejector from the Coin Mechanism.
 2. Soak Rejector in warm water and a mild liquid household detergent for approximately ten (10) minutes.
 3. Use a stiff paint brush or toothbrush to clean foreign matter from the Rejector.
 4. Rinse in clean warm water.
 5. Dry thoroughly by shaking or by applying filtered compressed air.
-

ACCEPTOR: (Micro-MechTM)

Coin Ramp and the back of the Acceptor Lid should be kept clean at all times. Use a damp cloth only. For problem cleaning, use a cloth dampened with water and a mild soap.

Warning

DO NOT USE SOLVENTS, STEEL WOOL, SCOURING PADS OR A METAL BRISTLE BRUSH. DO NOT SPRAY WITH ANY TYPE OF LUBRICANT.

TROUBLE SHOOTING:

- I. Vendor refuses all coins.
 - A. Lights for product or selector are out.
 - 1) Check power cord to see if it is plugged in.
 - 2) Check fuse or circuit breaker in building for power.
 - 3) Check black or white wire from line cord to transformer.
 - B. Lights are on, but C.R.E.M. coils are not pulled in.
 - 1) Check circuit breakers on relay panel.
 - 2) Check for power to Changer. Operate Inventory Switches; Payout Motor should run.
 - 3) Check all Tray Plugs and Receptacles for proper connection.
 - a) Turn each Motor clockwise by hand, starting with #1. They should run by themselves after a slight turn.
 - b) When you find the first Motor that does not run, you have found the break in the series circuit. It is between the last Motor that ran and the first Motor that did not.
 - c) If you center the first Motor that did not run in its detent and the C.R.E.M. Coils push in, the motor is defective or a wire is off of the Coil of the Motor.
 - d) If you center the Motor that did not run and the C.R.E.M. Coils do not pull in, there may be a wire off of the Cycle Switch or the Switch is defective.
 - e) Also check the Plugs on the Trays of both Motors if the last one to run was the last Motor in a tray and the first Motor that did not run is the first Motor in the next Tray.
 - 5) Check to make sure Gum and Mint Drawer is securely closed to activate Drawer Switch.
 - 6) Check to make sure the Switch on the Gum and Mint Drawer is working.
 - 7) Check to make sure the Gum and Mint Adaptor Harness is properly and securely connected.
 - C. Lights are on and the C.R.E.M.s are pulled in.
 - 1) Check rejector.
 - a) Check Coin Paths for foreign material. Coin Paths must be clean.
 - b) Check rejector on level surface and drop coins in to find the problem.
 - 2) Check to see that the blocking fingers do not protrude into Coin Paths. (Coinco Changer only.)
 - 3) Check to see that the Vendor is level.
 - II. Coin Mechanism accepts dimes and nickles, but no quarters and correct change light is on.
 - A. Check to see if the Pay Out Tubes have enough change.
 - B. Check to see if the Change Empty Switch is activated.
 - III. Coin Mechanism accepts dimes and nickles, but no quarters and the correct change light is out.
 - A. Check for burned out Change Light and no change.
 - B. Check Rejector for foreign material in quarter rack.
 - C. Quarter C.R.E.M. may be defective.
 - IV. Coin Mechanism accepts quarters, but no dimes or nickles.
 - A. Check Rejector for foreign material in dime or nickel track.
 - B. Check for defective Nickel-Dime C.R.E.M. coil.
 - V. Vendor vends properly, but pays out wrong or no change.
 - A. Prices are set wrong.
 - B. Product not zoned properly.
 - C. Changer is set to accept quarters all the time, but change tubes are empty.
 - D. Defective Credit System in Coin Mechanism. (Replace unit.)
 - E. Broken Motor Cycle Switch on a previously select Selection Motor.
 - F. A defective Multi-Price Coinage System. (Replace system.)
 - G. Defective Pay Out System in Coin Mechanism. (Replace unit.)

VI. Vendor accepts money, but will not vend on all selections.

- A. Prices are set wrong.
- B. Check plugs behind relay panel and on selector switches.
- C. Broken or loose white/orange wire from Relay Panel to Motors.
- D. No credit from Coin Mechanism. (Replace unit.)
- E. A defective Multi-Price Coinage System. (Replace system.)

VII. One Tray will not vend; the rest of the machine is normal.

- A. Check plug on Tray for loose or broken white/orange wire.
- B. No Price Line from Coin Mechanism. (Coinco Changer only.) (Replace unit.)
- C. A defective Multi-Price Coinage System. (Replace system.)

VIII. One selection in Tray does not work, rest of machine is normal.

- A. Defective motor.
- B. Loose or broken wire on Motor Coil.
- C. Loose or broken Selection Wire between Selector Button and Motor.
- D. Defective Selector Switch.

E. A defective Multi-Price Coinage System. (Replace system.)

IX. Vendor presselects one product when credit is reached.

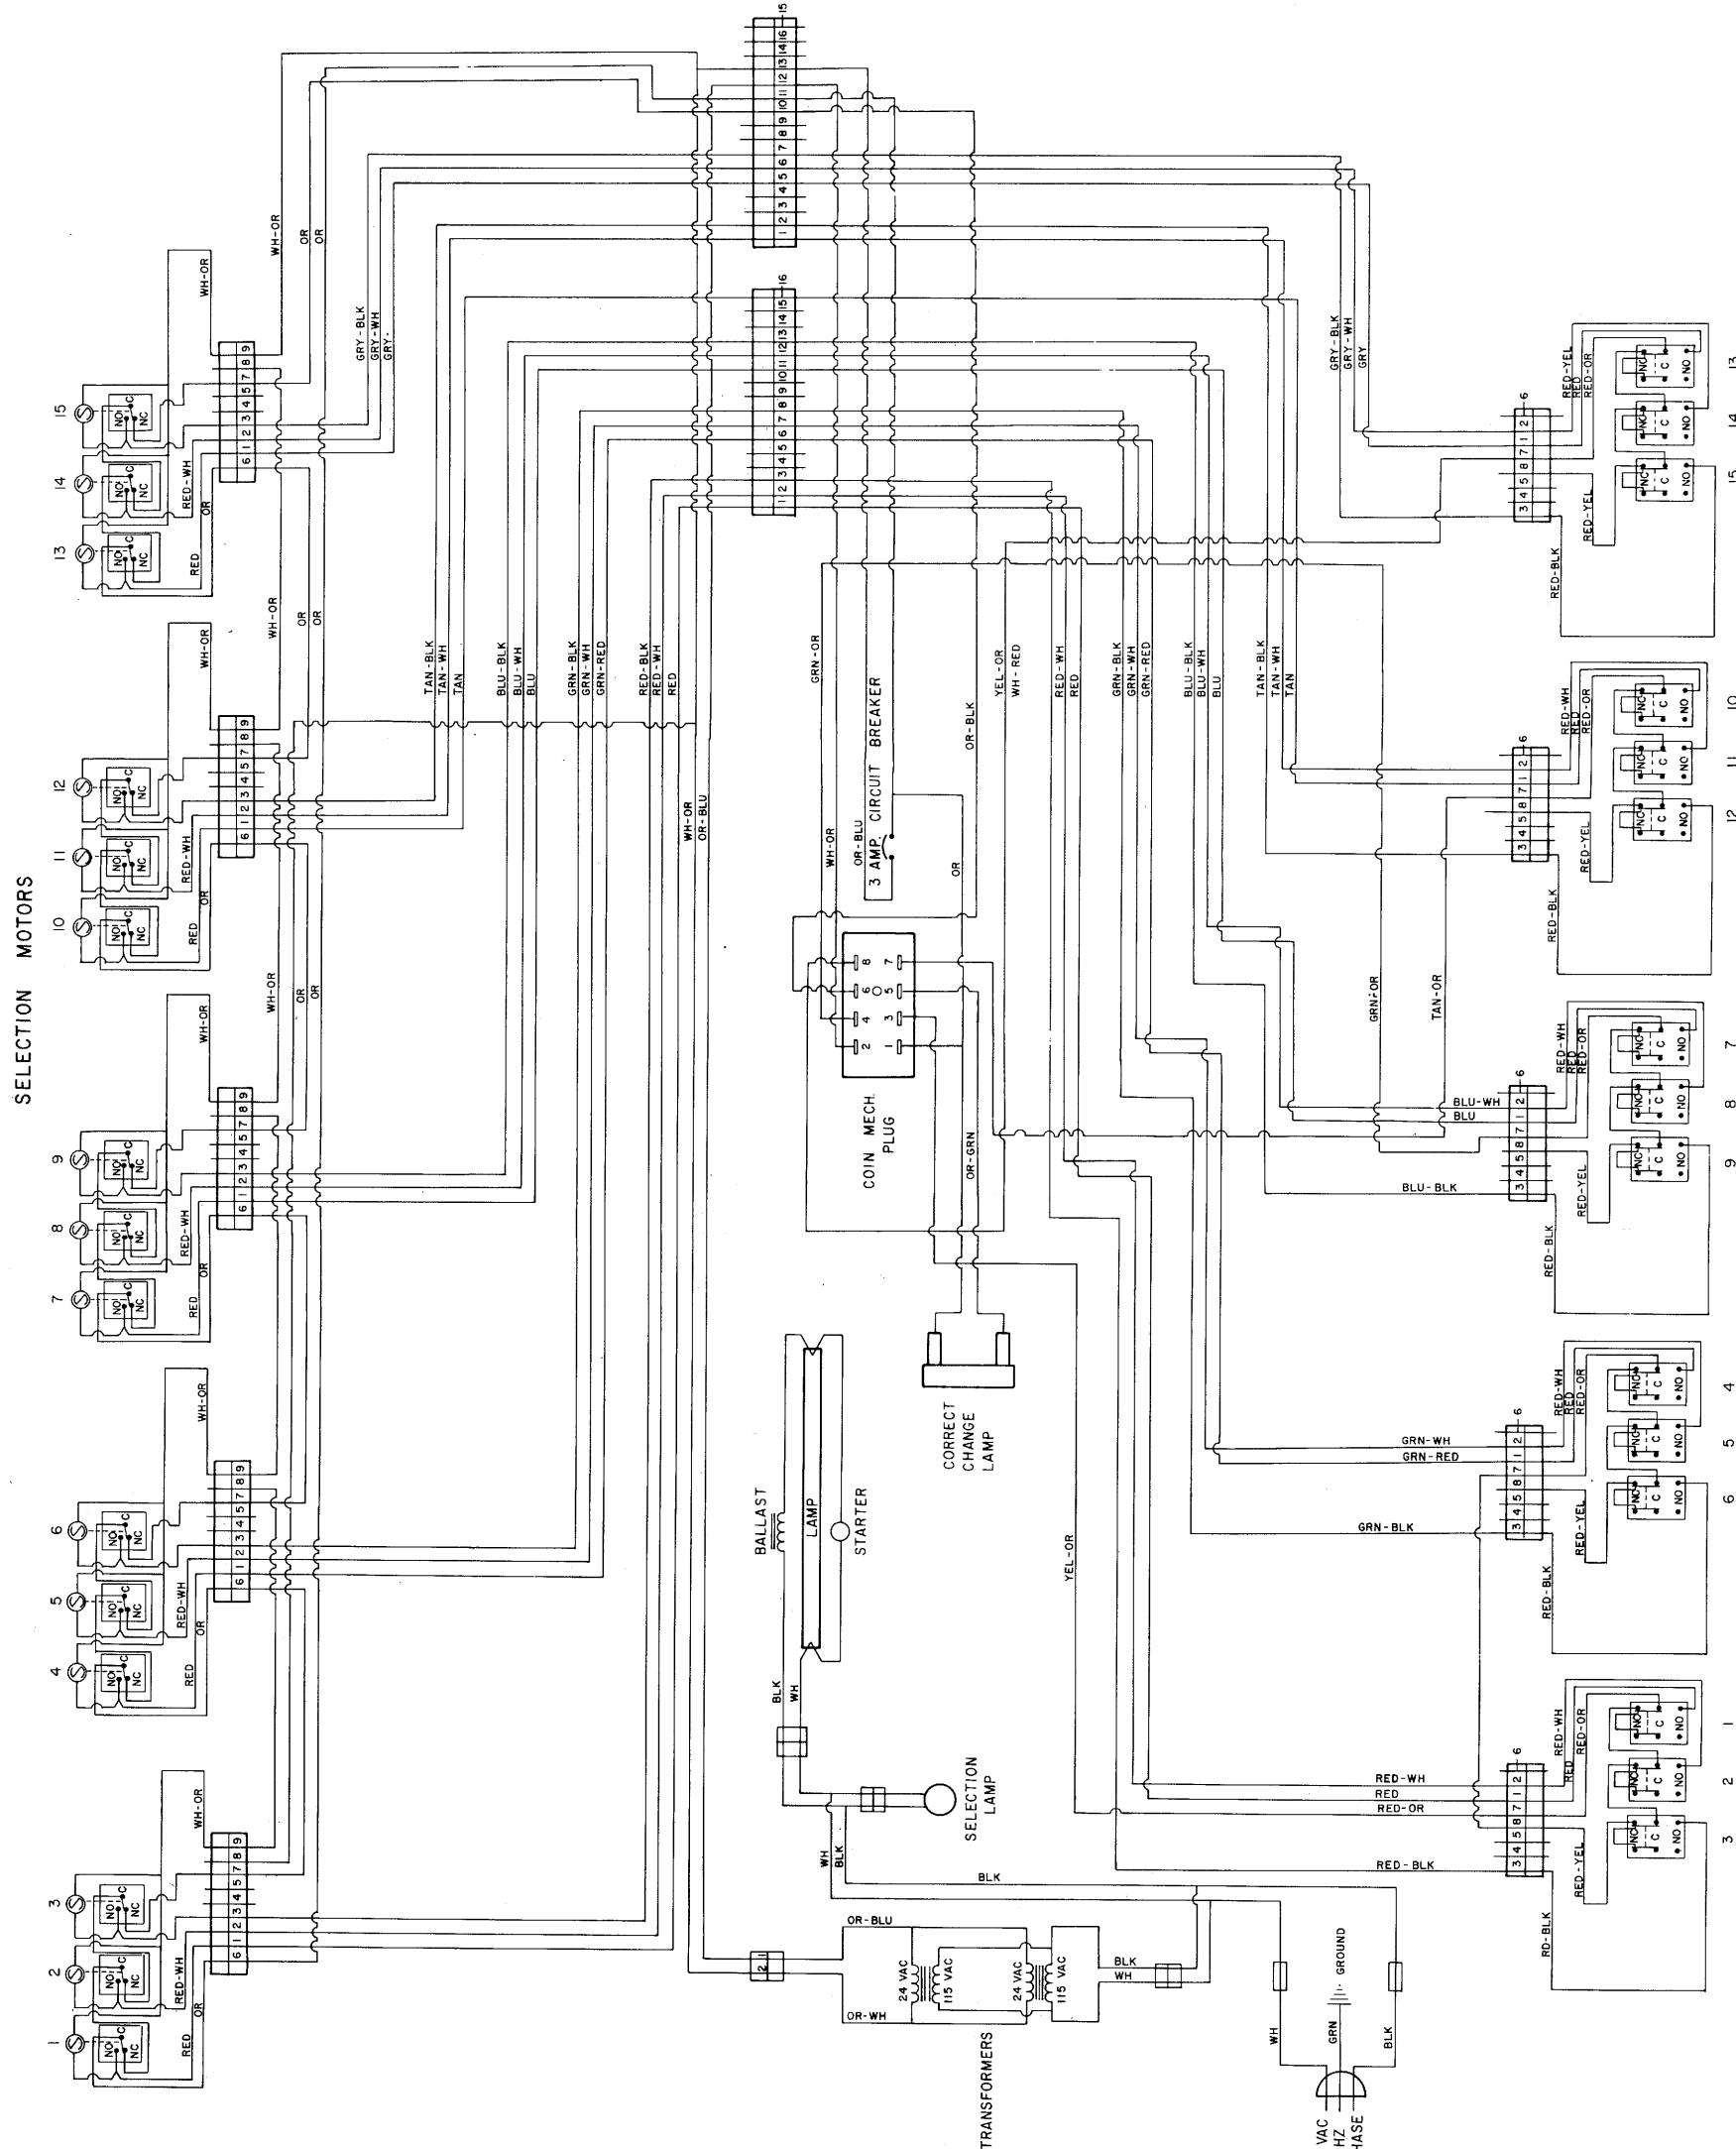

- A. Check for stuck Push Buttons.
- B. Check for shorted Selector Switch.

X. Vendor free vends on one selection.

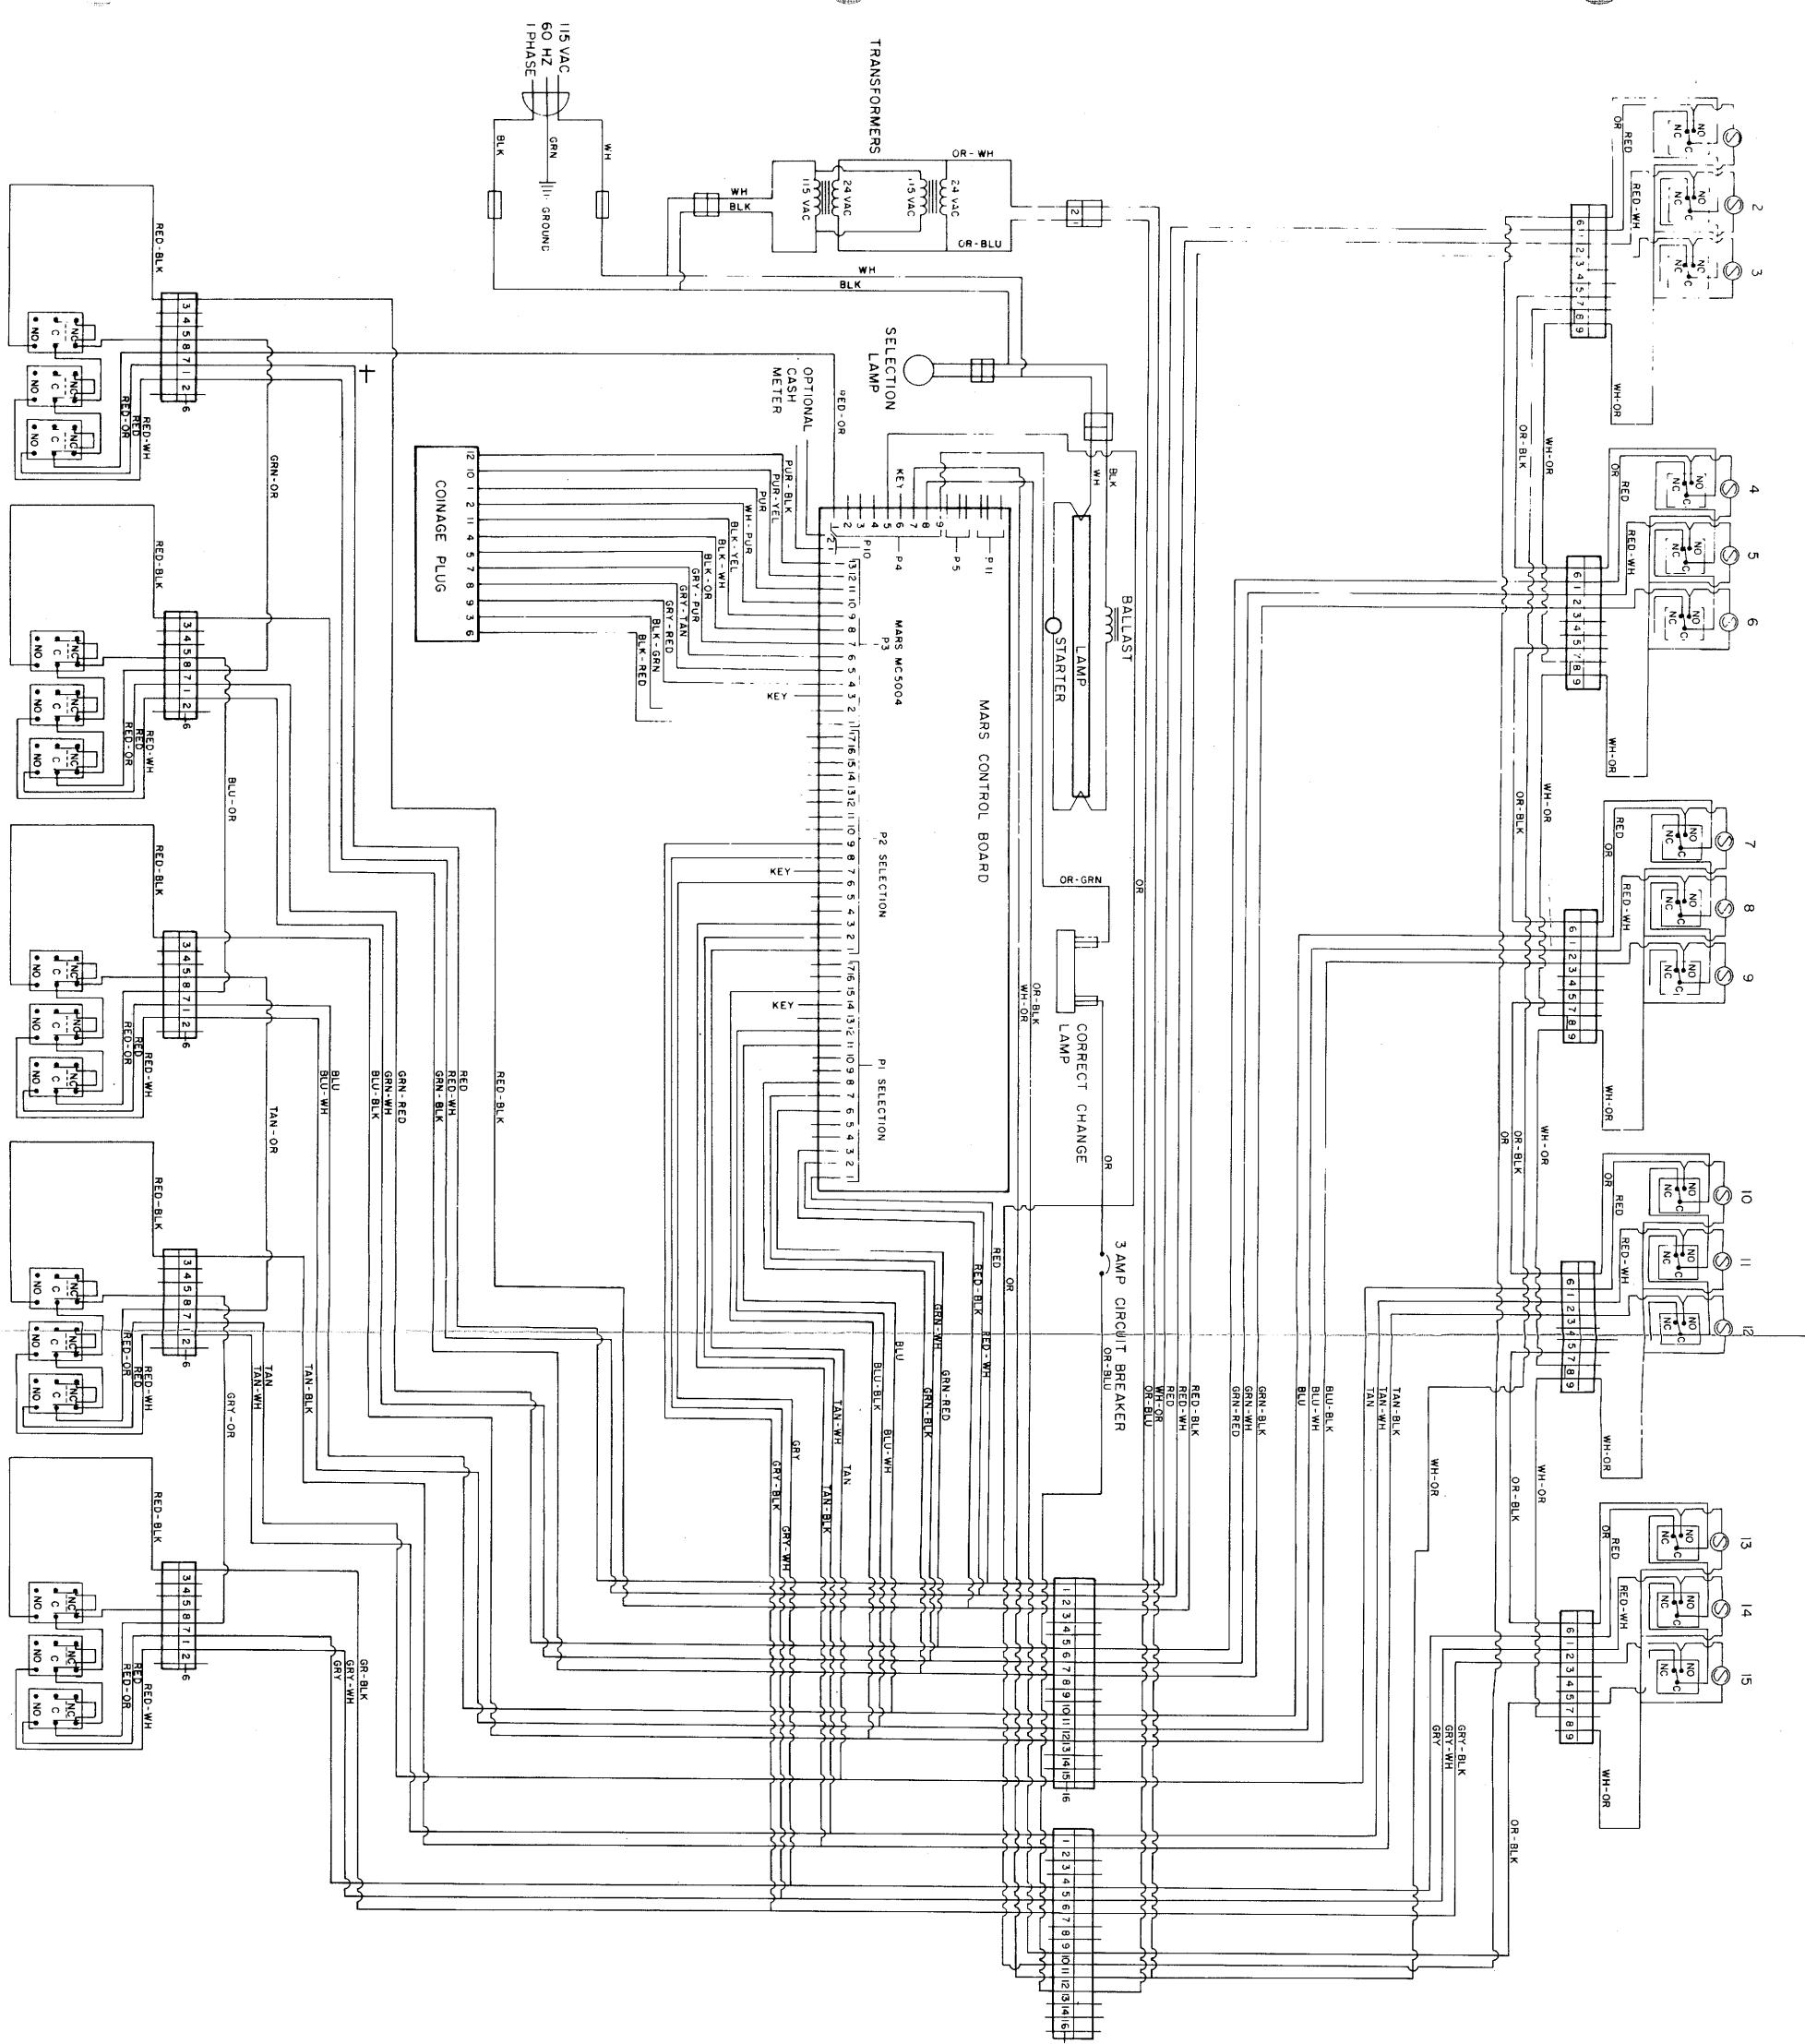

A. Credit not cancelled because Motor Cycle Switch is not breaking C.R.E.M.s.

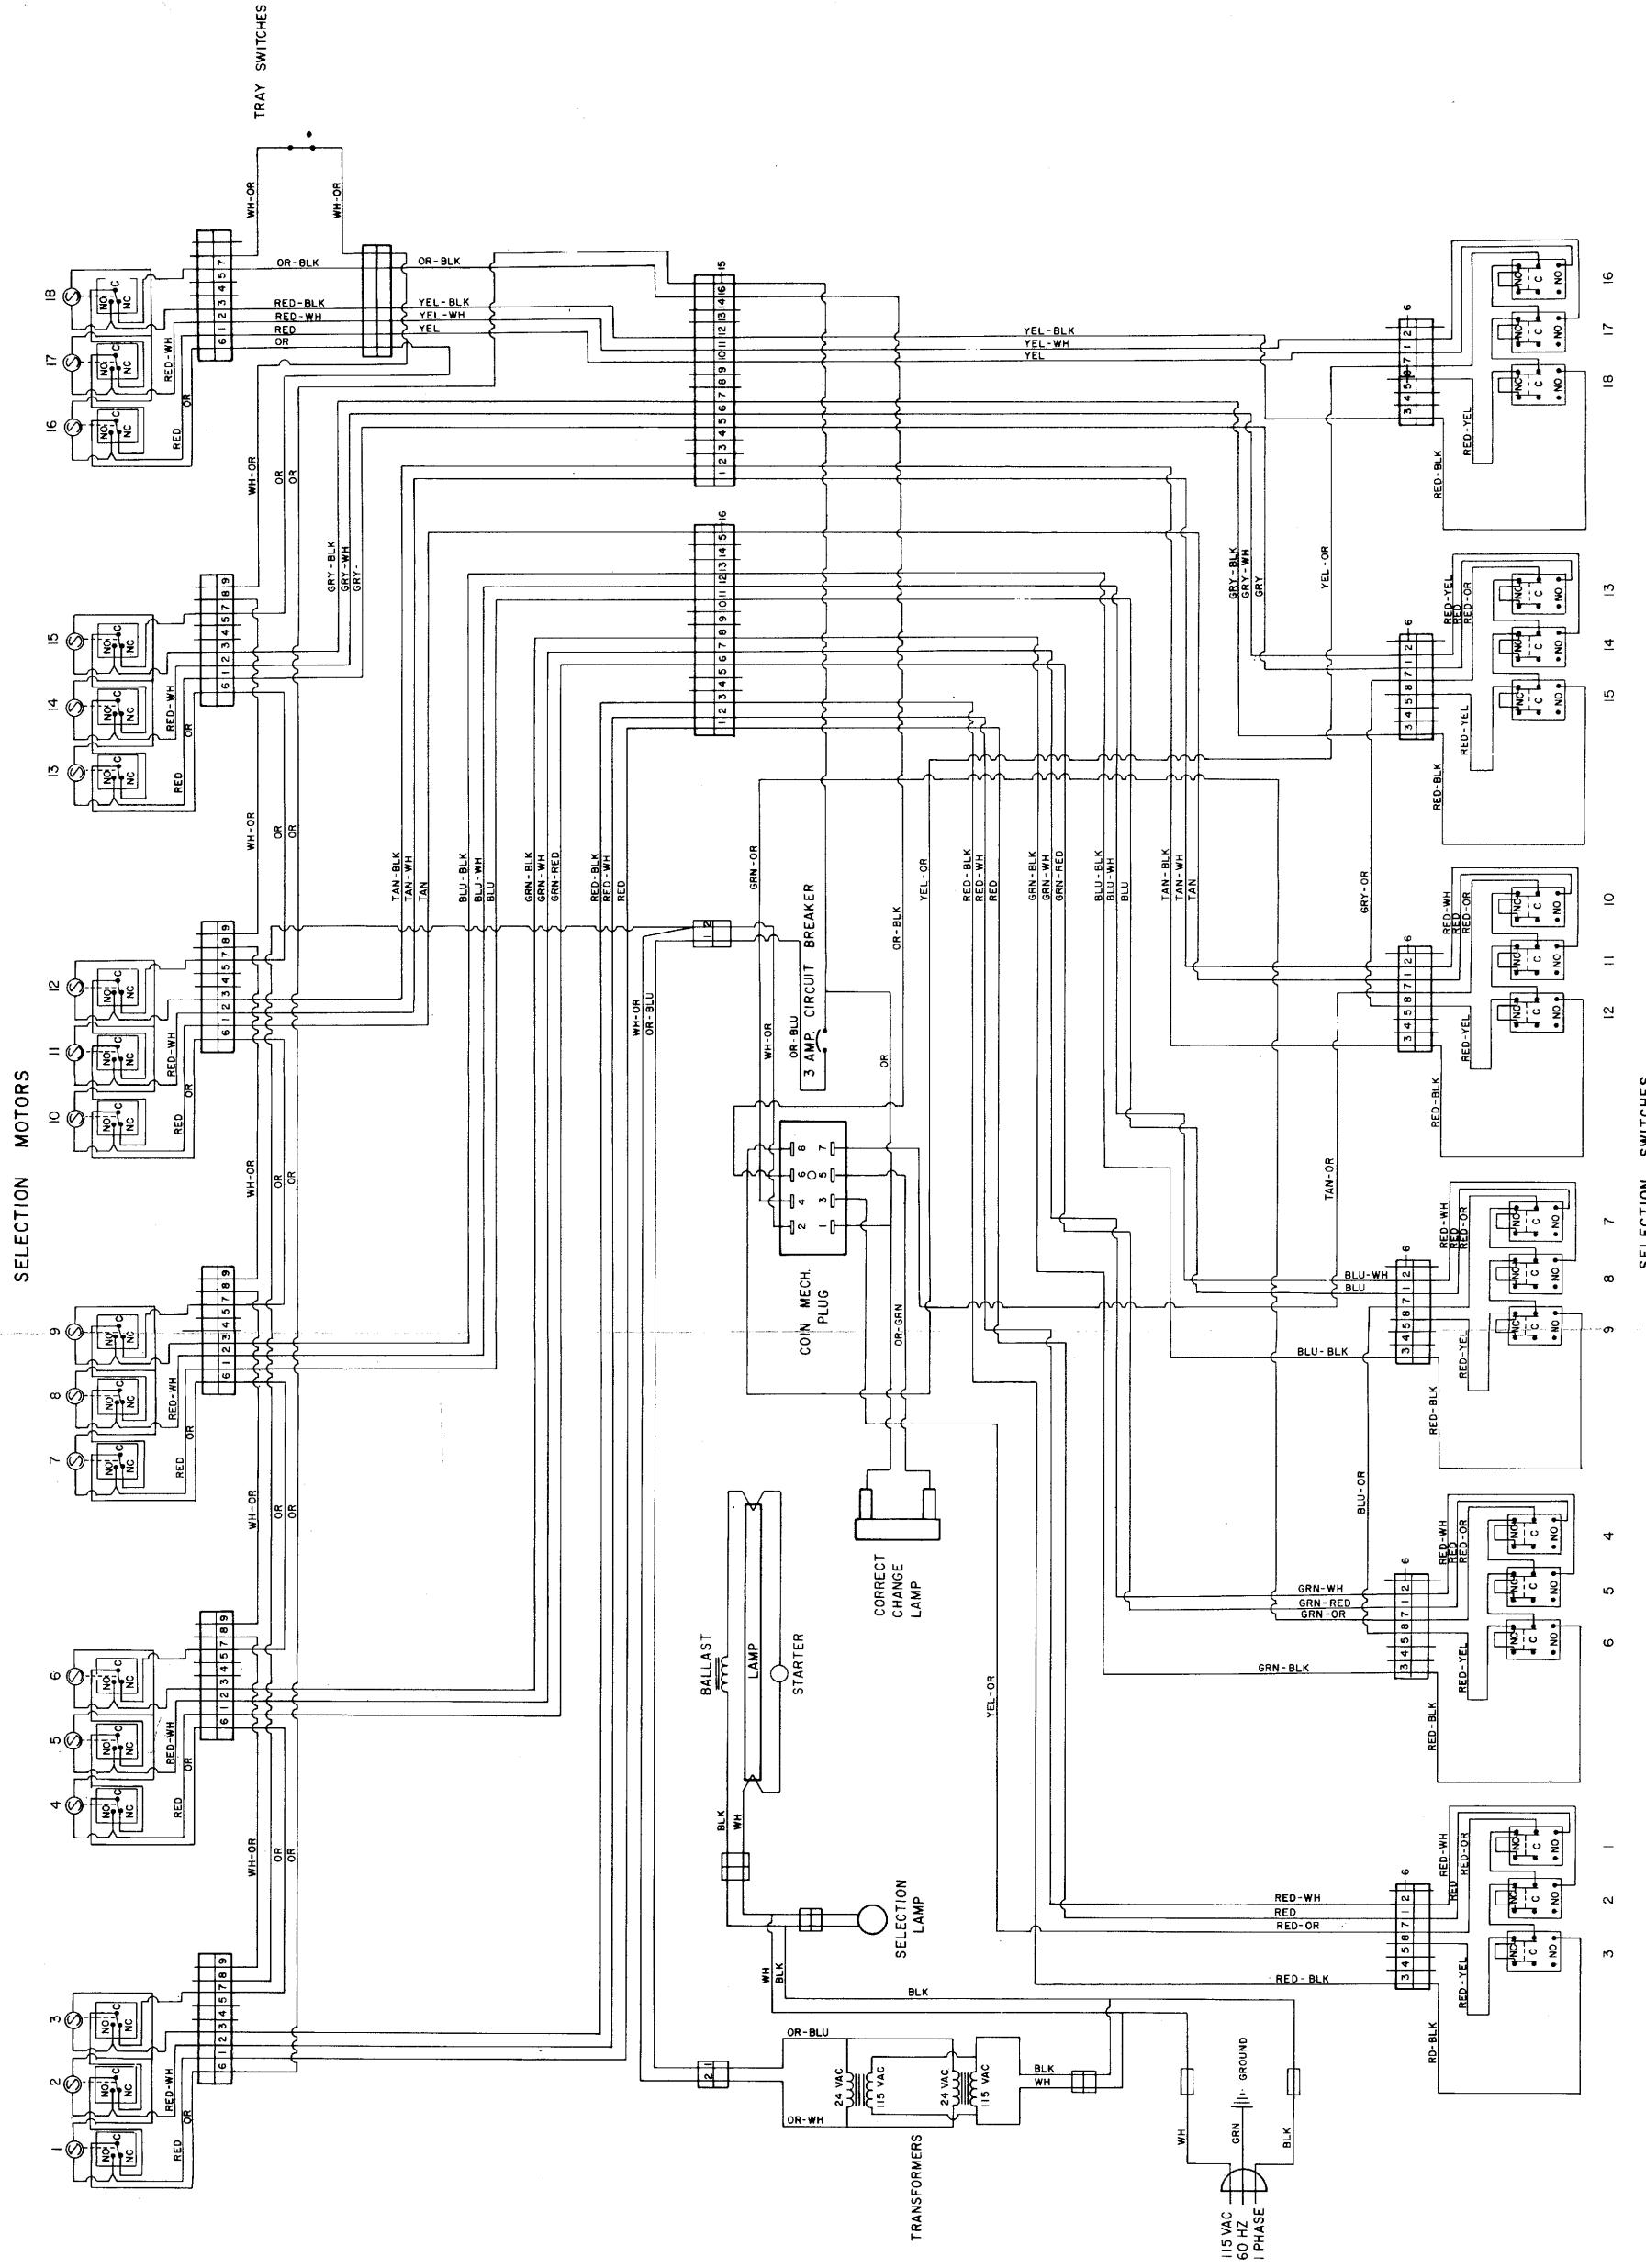

XI. Vendor will not allow vend price to be set.

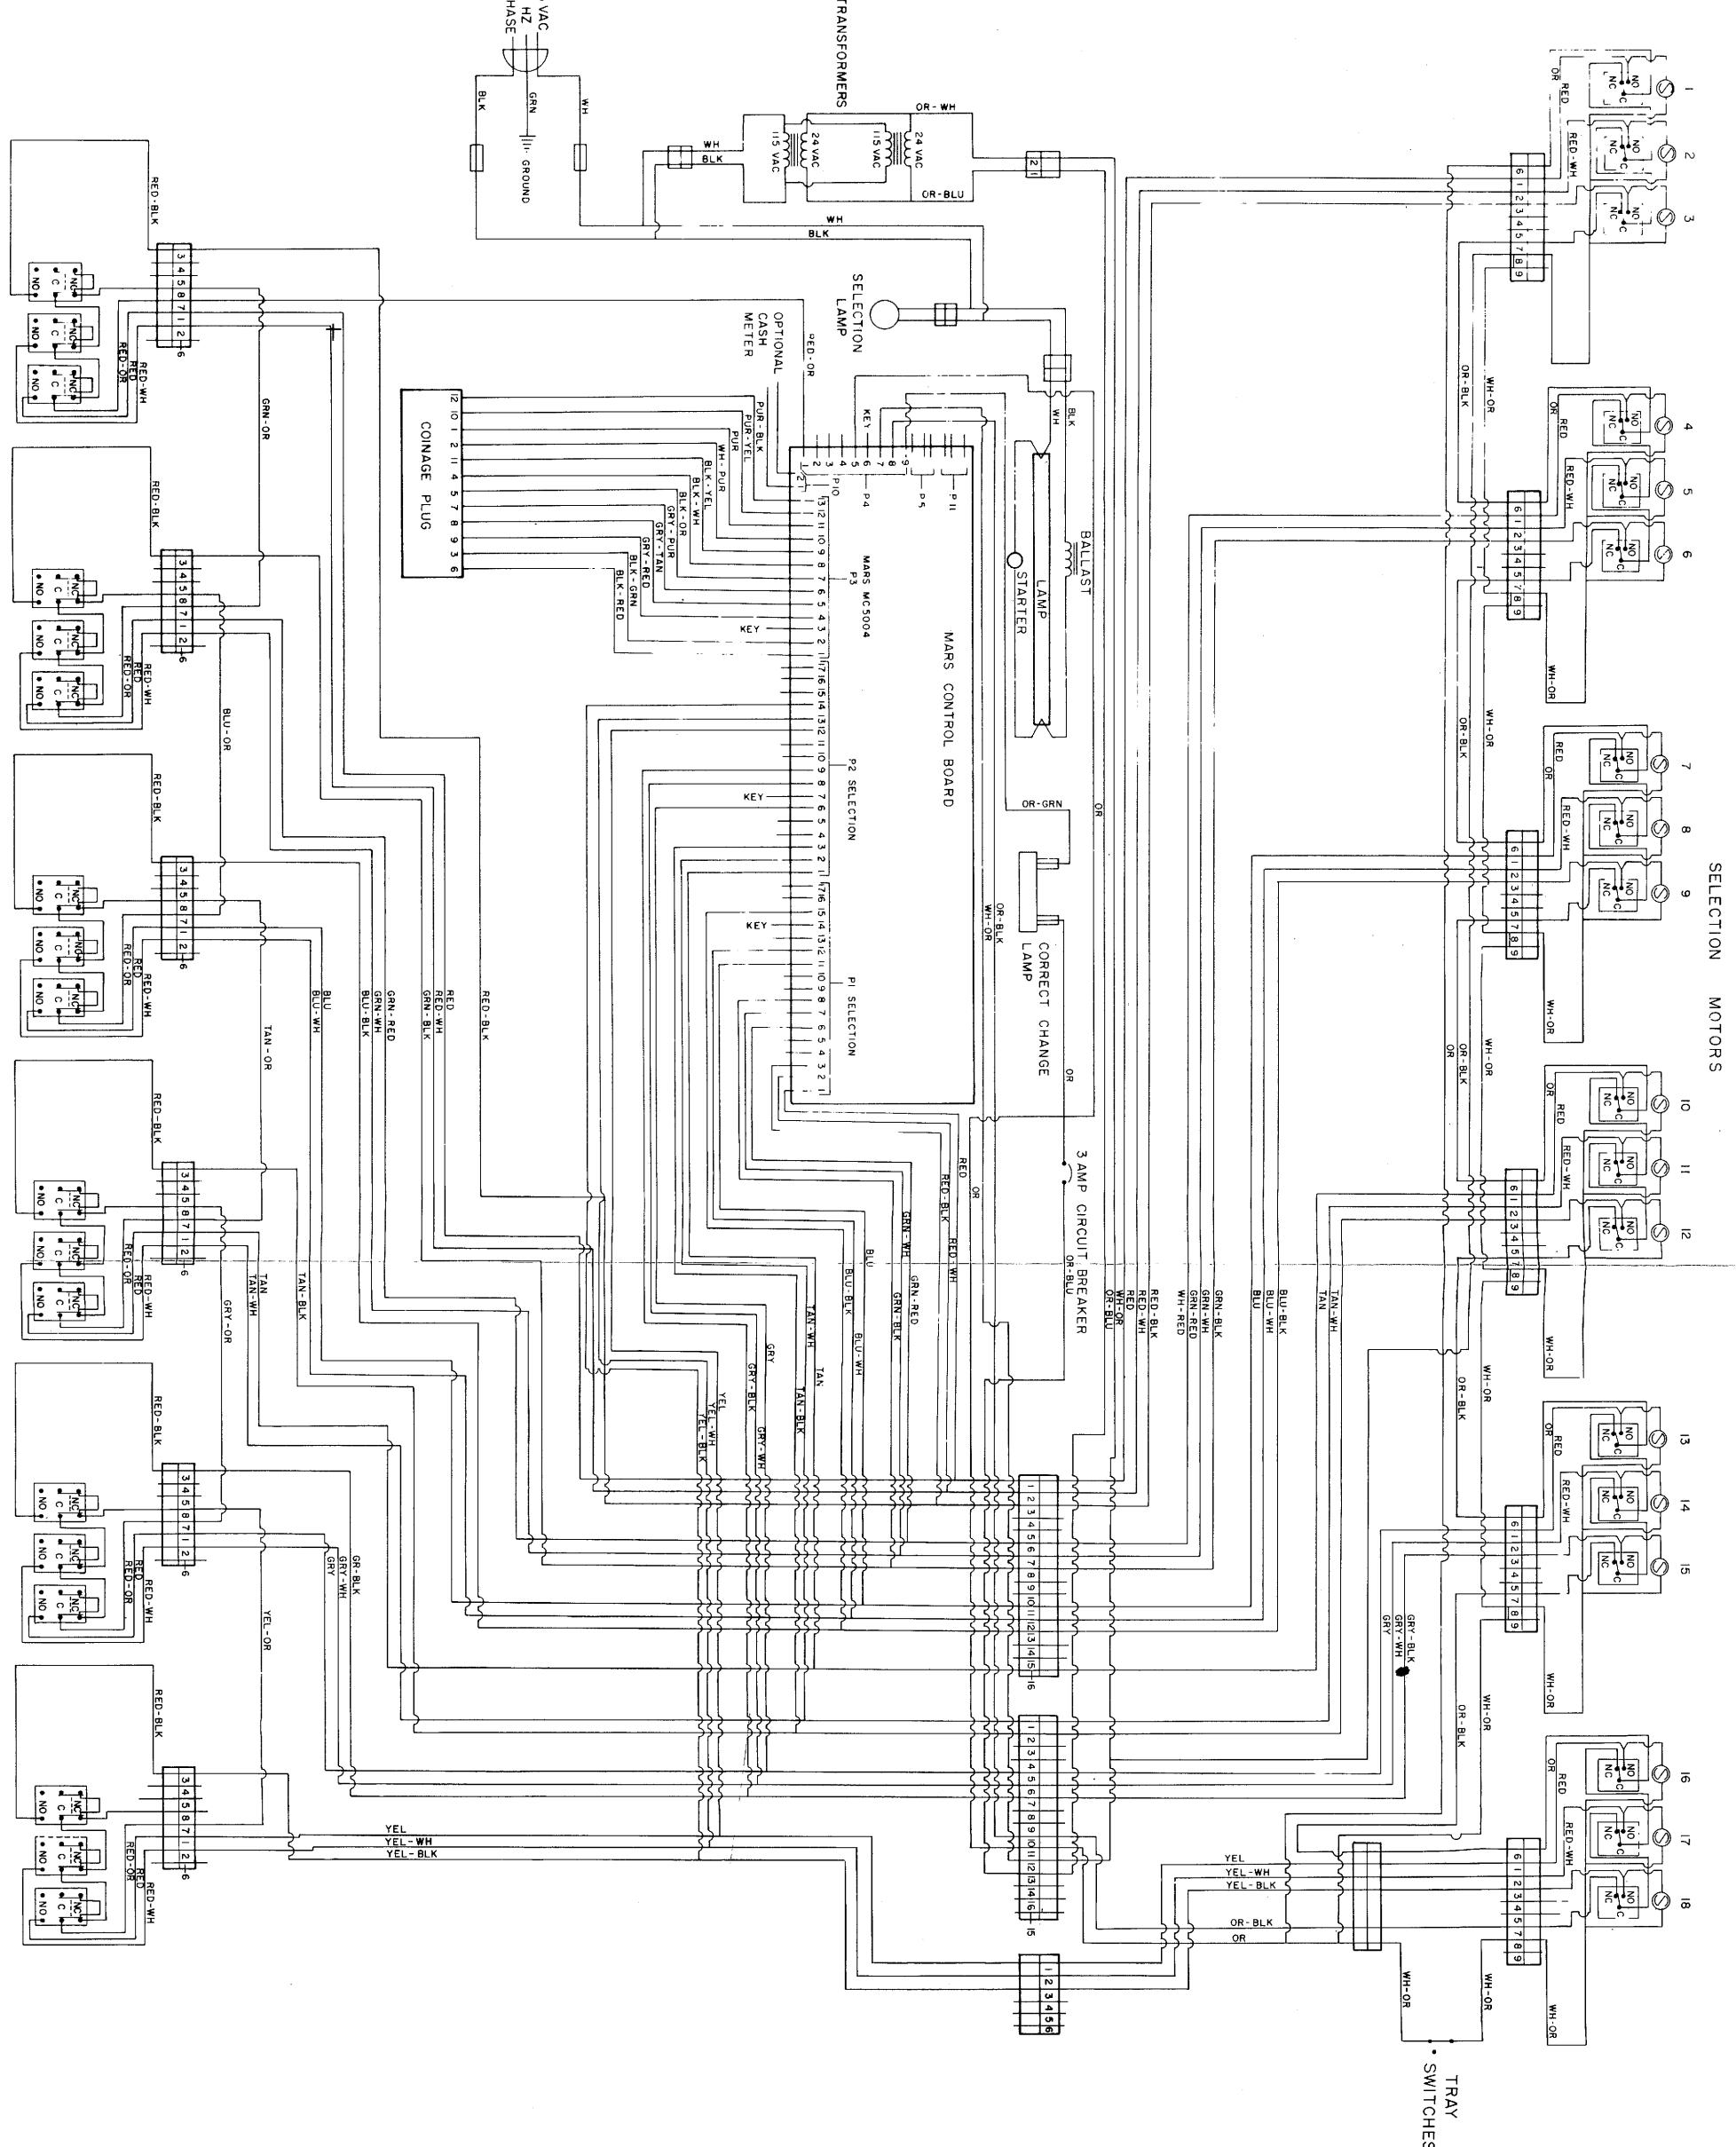

- A. Broken Motor Cycle Switch on a Selection Motor.
- B. Bad Coin Mechanism. (Coinco Changer only.) (Replace unit.)
- C. A defective Multi-Price Coinage System. (Replace system.)
